September 2026

Dear Customers and Suppliers,

Re: Digital Waste Tracking (DWT) – Preparing for October 2026

You may have recently seen communications from DEFRA and the Environment Agency regarding the introduction of Digital Waste Tracking (DWT).

The first phase of these new regulations comes into effect on **1 October 2026** and will apply to all waste receiving sites across England. We would like to update our customers and suppliers on the steps Avon Material Supplies (AMS) is taking to ensure a smooth transition and full compliance with the new requirements.

What is changing?

Phase 1 of Digital Waste Tracking will require all waste receiving sites to submit information relating to waste received at their facilities through the national Digital Waste Tracking system.

What are AMS doing to prepare?

To ensure we are ready for implementation, AMS successfully transitioned to a new waste management system on **1st September 2026**. We are currently completing final data checks and system preparations to ensure all information is recorded in the correct format for Digital Waste Tracking submissions from 1 October 2026.

Our new system is fully compliant with DWT requirements and has been designed to automatically submit the required information to DEFRA following the completion of each transaction.

How will this affect our customers?

We expect the transition to be seamless, and customers visiting any of our sites should not experience any delays as a result of the new requirements.

To help ensure transactions continue to run smoothly, please make sure that:

- Waste descriptions are accurate and up to date.
- We are informed of any changes to your waste carrier details.
- Your contact information remains current.
- Any relevant waste documentation is provided when required.

Maintaining accurate information will help us meet our regulatory obligations and avoid any unnecessary delays.

What happens next?

Phase 2 of Digital Waste Tracking is expected to extend the requirements to waste carriers, brokers and dealers from **October 2027**. AMS is already preparing for this next stage, and our systems are being developed to ensure full compliance well ahead of the implementation date.

If you have any questions regarding Digital Waste Tracking or how these changes may affect your business, please do not hesitate to contact us.
